

Invitation to closing event

Telehealth solution in ageing

Findings from an interprofessional, intercultural subject

Learn.On* is a project of the Faculty of Healthcare and Nursing of the Catholic University of Applied Sciences Mainz. The project is led by Prof. Dr. Sabine Corsten.

Learn.On aims to...

- ... promote digital and intercultural learning.
- ... facilitate international exchange.
- ... develop a health science teaching concept regarding telehealth in ageing.

Speech pathology and physiotherapy students from the Catholic University of Applied Sciences Mainz and La Trobe University Melbourne participated in a virtual seminar. They developed a prototype for a telehealth solution to support older people in everyday life.

In the closing event of the project, the students and the project team will share their experiences with the interprofessional and intercultural subject. The students will present their prototype, including the initial idea, the development, and the evaluation.

The closing event will be held in a hybrid format. You are welcome to participate either online or face-to-face. **Participation is free of charge.**

* funded by the German Academic Exchange Service and the Federal Ministry of Education and Research

Would you like to participate face-to-face?
